INSTRUCTIONS FOR SURGERY

In order to make your admission and hospital stay smooth and more pleasant, please comply with the following instructions:

☐ If your surgery is on MONDAY, please report to:

NYU Hospital for Joint Diseases
301 East 17th Street
New York, NY 10003

If indicated by your physician, schedule your pre-surgical testing, located at

303 2nd Avenue, 1st Floor Suite 16
New York, NY 10003

☐ If your surgery is on FRIDAY, please report to:

NYU Langone Outpatient Surgery Center
339 East 38th Street
New York, NY 10016

If indicated by your physician, please call 212-263-5985 to schedule your pre-surgical testing, located at

240 East 38th St.
New York, NY 10016
Mezzanine Level

*One business day prior to your surgery, hospital staff will contact you to finalize your surgery time.

A. Bring jogging/warm-up pants, shorts/skirt if having knee surgery.

B. Bring a shirt/blouse that buttons open in front instead of a pullover if having shoulder/elbow surgery.

C. If you own crutches, bring them with you, if having knee, ankle or hip surgery.

D. Bring all medications or a list of current medications you are taking with you. Also bring a list of any allergies.

E. Blood pressure medication should be taken as usual with a sip of water the morning of surgery. DO NOT take a diuretic or fluid pill. Seizure medications may be taken before surgery.

F. DO NOT take oral diabetes medications (pills) the night before or the day of surgery. If you are on insulin, DO NOT use insulin the morning of surgery unless you are a "problem diabetic" in which case you need to consult your physician regarding the proper insulin dose for you to use prior to surgery.

Center for Musculoskeletal Care 333 E. 38th St, New York, NY 10016
Tel: (646) 501-7223/ Fax: (646) 754-9505 / www.NewYorkOrtho.com
G. Please **DO NOT** wear makeup or nail polish the day of surgery. You will need to remove contact lens (including extended wear), denture, or bridges prior to surgery. Please bring your own containers for storage.

H. Leave all jewelry and valuables at home. The hospital will not take responsibility for lost or missing items.

I. You need to report any skin irritation, fever, cold, etc., to Dr. Jazrawi.

J. You will need to bring your insurance card/information with you.

K. **DO NOT** eat, drink (including water), chew gum, candy, smoke cigarettes, cigars, use smokeless tobacco, etc., after midnight the night before surgery or the morning of your surgery. The only exception is a sip of water to take necessary medications the morning of surgery.

L. You must arrange someone to drive you home when ready to leave the hospital. You will not be allowed to drive yourself home after surgery. We can assist you if you need transportation to the airport or hotel, however, you need to let us know in advance (if possible) so we can make the arrangement.

M. **NOTE:** **DO NOT** take any aspirin, aspirin products, anti-inflammatories, Coumadin or Plavix at least 5 days prior to surgery. You are allowed to take Celebrex up to your day of surgery. If your medical doctor or cardiologist has you on any of the above medications. Please check with him/her before discontinuing the medication. You may also take Tylenol or Extra-Strength Tylenol if needed.

**Nonsteroidal Anti-Inflammatory (Arthritis) Medications:**

Some of the most common names for frequently used NSAID's include: Motrin, Indocin, Nalfon, Naprosyn, Naprelan, Arthrotec, Tolectin, Feledene, Voltaren, Clinoril, Dolobid, Lodine, Relafen, Daypro, Advil, Aleve, Ibuprofen.

Your first follow up appointment is usually scheduled for approximately 2 weeks after your surgery at the 333 East 38th street office. The date and time of your follow-up is ________________.

If you cannot make this appointment or need to change the time, please contact the office.

If you have any questions regarding your surgery, please contact the office at 646-501-7223 option 4, option 2 or via the internet at www.newyorkortho.com
Home Supplies For Your Surgery
Laith M. Jazrawi M.D.

Open Surgery

A. **Open knee surgery** (ACL reconstructions, ALL (Anterolateral ligament) reconstructions, Autologous Chondrocyte Implantation, PCL reconstructions, High tibial osteotomy, Distal femoral osteotomy, Posterolateral corner reconstruction, MCL reconstruction, OATS (osteochondral autograft), Osteochondral allograft):
   a. You will need 4x4 (or similar size) waterproof bandages for fourteen days. **Bandage changes for open knee surgery done post-op day #3.**

B. **Open shoulder surgery**, (Biceps Tenodesis, Latarjet, Open capsulorrhaphy, Glenoid reconstruction using Distal tibial allograft):
   a. You will need 4x4 (or similar size) waterproof bandages for fourteen days. Also, a box of **Bandage changes for open shoulder surgery are done post-op day #3.**

C. **Open Ankle Surgery** (Achilles Tendon Repair, Os Trigonum Excision, Ankle OCD, Modified Brostrom-Gould Procedure, Peroneus Longus/Brevis Repair)- You do not have to worry about dressing changes as your leg will be in splint/cast for the first two weeks

D. **Open Elbow surgery** (Distal Biceps Repair, LCL Reconstruction, Radial Head or Capitellum ORIF, Radial Head Replacement/Resection, Triceps Repair, UCL Reconstruction – Tommy John Surgery)- You do not have to worry about dressing changes as your arm will be in splint/cast for the first two weeks. **For Tennis Elbow surgery (lateral epicondylitis) and Golfer’s Elbow Surgery (medial epicondylitis), dressing changes are are started on post-op day #3.** You will need 4x4 (or similar size) waterproof bandages for fourteen days.

E. **Hamstring repair** You will have a special dressing placed on at the time of surgery that will be kept on for the first 2 weeks after surgery. You will then need 4x4 (or similar size) Tegaderm or Telfa waterproof dressings. Also, a box of 4” by 4” gauze sponges if there is bleeding at the incision site.

Arthroscopic Surgery

A. For Arthroscopic shoulder, elbow, knee, or ankle surgery:
   a. Regular adhesive bandages (“Band-aids”) can be used for arthroscopic portals x 2 weeks.
   b. If biceps tenodesis was performed, use 4x4 (or similar size) waterproof bandages on wounds.
   c. In general, dressing changes for arthroscopy are done on post operative day 3
Post-Operative Medication Administration

Knee Arthroscopy

- Pain- Motrin 800mg. 1 tab three times daily, as needed
- Adjunctive pain: Percocet (Oxycodone/Acetaminophen) 10/325; One tab every 6 hours as needed for adjunctive pain
- DVT prophylaxis- Aspirin 325mg; One tab daily x 10 days
- ****Aspirin starts post-operative day #1
- Patients on birth control or history of clotting; Xarelto 10mg x 14 days followed by Aspirin 325mg daily x 28 days (Xeralto starts POD #1)

Knee Ligament Reconstruction

- Pain- Percocet (Oxycodone/Acetaminophen) 10/325; One tab every 6 hours as needed.
- Breakthrough Pain – Dilaudid (Hydromorphone) 2mg; 2-3 tabs every 8 hours as needed for adjunctive pain.
- Antibiotic – Keflex 500mg; One tab 4 times daily x 4 days
  - Keflex allergy – Clindamycin 300mg; One tab twice daily x 7days.
- Constipation – Docusate (Colace) 100mg; 1 tab twice daily as needed.
- DVT prophylaxis- Aspirin 325mg; One tab daily x 10 days
  - Patients on birth control or history of clotting; Xarelto 10mg x 14 days followed by Aspirin 325mg daily x 28 days
- ****Antibiotics and Xeralto or Aspirin start post-operative day #1

Non-weight bearing Lower Extremity Surgery (Meniscal Repair, Meniscal Root Repair, Distal Femoral Osteotomy, High Tibial Osteotomy, Tibial Tubercle Osteotomy, Cartilage Transplant)

- Antibiotic – Keflex 500mg; One tab 4 times daily x 4 days
  - Keflex allergy – Clindamycin 300mg; One tab twice daily x 7days.
- Pain- Percocet (Oxycodone/Acetaminophen)10/325; One tab every 6 hours as needed.
- Adjunctive Pain – Dilaudid (Hydromorphone) 2mg; 2-3 tabs every 8 hours as needed for adjunctive pain.
- Constipation – Docusate (Colace) 100mg; 1 tab twice daily as needed.
- DVT prophylaxis- Xarelto 10mg; One tab daily x 14 days followed by Aspirin 325mg daily x 28days.
- *****Antibiotics and Xeralto or Aspirin start post-operative day #1
Shoulder/Elbow Surgery

- Antibiotic – Keflex 500mg; One tab 4 times daily x 4 days
  - Keflex allergy – Clindamycin 300mg; One tab twice daily x 7days.
- Pain- Percocet (Oxycodone/Acetaminophen) 10/325; One tab every 6 hours as needed.
- Adjunctive Pain – Dilaudid (Hydromorphone) 2mg; 2-3 tabs every 8 hours as needed for adjunctive pain.
- Constipation – Docusate (Colace) 100mg; 1 tab twice daily as needed.
- Patients on birth control: Aspirin 325mg daily x 14 days.

Ankle fracture surgery

- Antibiotic – Keflex 500mg; One tab 4 times daily x 4 days
  - Keflex allergy – Clindamycin 300mg; One tab twice daily x 7days.
- Pain- Percocet (Oxycodone/Acetaminophen) 10/325; One tab every 6 hours as needed.
- Adjunctive Pain – Dilaudid (Hydromorphone) 2mg; 2-3 tabs every 8 hours as needed for adjunctive pain.
- Constipation – Docusate (Colace) 100mg; 1 tab twice daily as needed.
- DVT prophylaxis- Xarelto 10mg; One tab daily x 14 days followed by Aspirin 325mg daily x 28days.
- ****Antibiotics and Xeralto start POD #1

Ankle arthroscopy +/- Microfracture and Achilles repair

- Pain- Percocet (Oxycodone/Acetaminophen) 10/325; One tab every 6 hours as needed.
- DVT prophylaxis- Aspirin 325mg; One tab daily x 10 days
- ****Aspirin starts post-operative day #1
- Patients on birth control or history of clotting; Xarelto 10mg x 14 days followed by Aspirin 325mg daily x 28 days (Xeralto starts POD #1)

Hamstring repair

- Antibiotic – Keflex 500mg; One tab 4 times daily x 4 days
  - Keflex allergy – Clindamycin 300mg; One tab twice daily x 7days.
- Pain- Percocet (Oxycodone/Acetaminophen) 10/325; One tab every 6 hours as needed.
- Adjunctive Pain – Dilaudid (Hydromorphone) 2mg; 2-3 tabs every 8 hours as needed for adjunctive pain.
- Constipation – Docusate (Colace) 100mg; 1 tab twice daily as needed.
- DVT prophylaxis- Xarelto 10mg; One tab daily x 14 days followed by Aspirin 325mg daily x 28days.
- ****Antibiotics and Xeralto start POD #1
Post-Operative Instructions
Elbow Arthroscopy and Removal of Loose Bodies

Day of Surgery

A. Diet as tolerated.
B. Pain medication as needed every 6 hours.
C. Icing is important for the first 5-7 days post-op. While the post-op dressing is in place, icing should be done continuously. Once the dressing is removed on the first or second day, ice is applied for 20-minute periods 3-4 times per day. Care must be taken with icing to avoid frostbite.
D. Make sure you have a physical therapy post-op appointment set up for the first week-10 days after surgery.
E. If you have a splint or half cast, you will start PT after the splint is removed in the office at your first postoperative appointment which is usually at 2 weeks

First Post-Operative Day

A. Continue icing
B. You will need to keep your incision dry when taking a shower. Do this for about 2 weeks after surgery. If you have a splint or half cast (hardshell) leave it dry. No need to do dressing changes until your first follow-up visit at 2 weeks post-op.

Second Post-Operative Day

A. Continue icing

Third Post-Operative Day Until Return Visit

A. Continue ice pack as needed.
B. If you don’t have a split or half cast, you may remove surgical bandage after you shower and apply regular bandages to the wounds. If you have splint you do not need to change anything. Keep extremity dry

Call our office @ 646-501-7223 option 4, option 2 to confirm your first postoperative visit, which is usually about 1-2 weeks after surgery. If you are experiencing any problems, please call our office or contact us via the internet at www.newyorkortho.com.
Post Operative Rehabilitation Following Elbow Arthroscopy

Name: ________________________________ Date: __________________

Diagnosis: ________________________________ Date of Surgery: __________

Phase I – Immediate Motion Phase

• Goals
  o Improve/regain of range of motion
  o Retard muscular atrophy
  o Decrease pain/inflammation

• Day 1-4
  o Range of motion to tolerance (elbow flexion/extension and supination/pronation)
  o Often full elbow extension is not capable due to pain
  o Gentle overpressure into extension
  o Wrist flex/extension exercises
  o Gripping exercises with putty
  o Isometrics for wrist/elbow
  o Compression/ice 4-5 times daily

• Day 5-10
  o Range of motion ext/flex (at least 20-90)
  o Overpressure into extension (4-5 times daily)
  o Joint mobilization to re-establish ROM
  o Continue isometrics and gripping exercises
  o Continue use of ice

• Day 11-14
  o ROM exercises to tolerance (at least 10-100)
  o Overpressure into extension (3-4 times daily)
  o Continue joint mobilization techniques
  o Initiate light dumbbell program (PREs)
  o Biceps, triceps, wrist flex/extension, sup/pronators
  o Continue use of ice post-exercise

Phase II – Intermediate Phase

• Goals
  o Increase range of motion
  o Improve strength/power/endurance
  o Initiate functional activities

• Week 3 to 4
  o Full ROM exercises (4-5 times daily)
  o Overpressure into elbow extension
  o Continue PRE program for elbow and wrist musculature
  o Initiate shoulder program (Thrower’s Ten Shoulder Program)
  o Continue joint mobilization
  o Continue use of ice post-exercise

• Week 4 to 7
  o Continue all exercises listed above
  o Initiate light upper body program
  o Continue use of ice post-exercise

Phase III – Advanced Strengthening Program

• Goals
- Improve strength/power/endurance
- Gradual return to functional activities

- **Criteria to Enter Phase III**
  - Full non-painful ROM
  - No pain or tenderness

- **Week 8 to 12**
  - Continue PRE program for elbow and wrist
  - Continue shoulder program
  - Continue stretching for elbow/shoulder
  - Initiate Interval program and gradually return to sporting activities

**Comments:**

**Frequency:** _____ times per week  
**Duration:** _____ weeks

**Signature:** ___________________________________________  
**Date:** __________________________
